NAVIGATING WITH ORION

Aim your index finger at the Orion North Arrow.

Align your thumb with the axis of the arrow. Keep thumb perpendicular to index finger. Your thumb now points directly at the North Celestial Pole... near enough equivalent to the North Star... anywhere on the Earth.

The orientation shows True North, and your thumb's inclination equals your Latitude.

2017, Frank Reed, ReedNavigation.com, Conanicut Island USA

Aim your index finger at the Orion North Arrow.

Align your thumb with the axis of the arrow.

Keep thumb perpendicular to index finger.

Your thumb now points directly at the North Celestial Pole...
